

## Tempohousing Newsletter

December 2017

### Launching new developed homes: bigger size and available all over Europe

Our team in Switzerland is right now completing the [studenthousing project](#) in the city of Sion.

These homes are new developed, measure 3 by 10 (up to 3,5 x 14) meter and comply with all building regulations in Europe. A beautiful new product, manufactured in Holland. The multifloor permanent prefab homes are available in most countries in Europe.

Over here at Tempohousing, we are gradually expanding our network worldwide and we look forward to open more local offices in the next year. In 2017 we opened offices in Ghana, in the United Kingdom and Ireland and this month in New Zealand.

**(our offices will be closed from Friday Dec 22 until Monday January 8, 2018)**

**We wish you  
happy holidays and  
a beautiful 2018!**
